

ALCOHOL AND DRUGS USE POLICY

AOS Orwell is determined to ensure that employees' use of either alcohol or drugs (prescribed), does not impair the safe and efficient operation of the company's activities. AOS Orwell ensures that the organization, people, equipment and the environment are not put at risk as a result of accidents or incidents caused by the misuse of drugs or alcohol in the work place. To achieve this objective, the company shall:

Alcohol

- Operate a positive action policy designed to prevent drink related problems by controlling the issue and restricting the use of alcohol in the company premises.
- Make employees aware of the long-term and short-term effects of consuming excessive amounts of alcohol through information and training programs.
- Line managers/supervisors to identify those who may have a problem, and to refer them for professional help.

Drugs

- Prohibit possession or use of those drugs which are normally declared illegal, such drugs includes but not limited to marijuana, cocaine and Heroin.
- Require those using legally prescribed drugs to inform their manager immediately on reporting to work. All staff who are under prescribed medication administration are required to seek advice from the prescribing practitioner as to whether the medication may affect their ability to safely perform their duties. Any impairment or restrictions must be immediately brought to the attention of their managers
- Carry out a random test on all staff.

For Cause

Screen personnel immediately where there is reasonable cause to suspect a breach of this policy or following an accident or incident, in order to determine if a person is in possession of or under the influence of alcohol, drugs or controlled substances.

In the event of random sampling, if any employee refuses to oblige test, it would be considered a breach to this policy.
