

AOS Orwell™

Proudly Indigenous: Delivering World Class Solutions

AOS Orwell **Company Profile**

Over 100 combined years of
delivering innovative oilfield
solutions.

About Us

AOS Orwell Limited is Nigeria's largest indigenous oilfield services company, providing a wide range of innovative products and services in well construction, process automation, instrumentation and control. Established in 1981 and rebranded in 2011 following the merger of Africa Oilfield Services Ltd and Orwell International, we have a strong reputation for quality and efficient service delivery.

With extensive experience in oilfield serving, we implement high-caliber inspection and maintenance programs adhering to manufacturer specifications and customer preferences. Our value-added well construction solutions serve E & P clients across Africa. We operate from bases in Port Harcourt, Nigeria, and Takoradi, Ghana, supported by sales offices in Lagos and Accra, ensuring comprehensive and personalized client support.

Committed to Nigerian local content, real-time technology transfer, and people development, AOS Orwell excels in service delivery excellence across all locations. We maintain the largest inventory of oilfield tools in West Africa and continuously expand our inventory, capacity, and services to meet the growing regional demand. Our dedication to safety, environmental responsibility and social accountability has earned us numerous awards from international oil companies (IOCs). Choose AOS Orwell for unparalleled expertise, exceptional service and a steadfast commitment to excellence in the oilfield servicing industry.

Why Choose AOS Orwell?

At AOS Orwell, we pride ourselves on being a comprehensive solution provider for the oilfield servicing industry in Nigeria. Here's why you should choose us:

Customer Centric

Our Customers are always at the center of all we do.

Experience

Over 37 years of business and technical experience in the Nigerian Oil & Gas sector.

Quality Service Delivery

Focus on exceeding customers expectations always

World-class Facilities

Our facilities have been built to world class standards.

Renowned OEM Partners

We partner with WorldClass OEMs to deliver excellently to our clients

Well Construction Division

Service Capabilities

Our Well Construction business specializes in Fishing, Casing and Tubular Running, Wireline and Slickline, DrillBits, DDFEWD, Casing Accessories, Jar and down hole tools rental, tubular rental, and Integrated well intervention/workover Services.

Fishing

- External and Internal Cutting and Recovery
- Plug and Abandon Services
- Thru tubing Applications
- Overshots, Grapples and Spears
- Wash Pipes, Shoes, Ditch & Fishing
- Magnets & Jars etc
- Hydrostatic Bailers, Junk Baskets, Magnets

Wireline, Slickline & Perforation

- Formation Evaluation
- Cement Evaluation
- Casing Evaluation
- Mechanical Services

Gyro Services

- North Seeking Gyro
- Drop Gyro

Casing and Tubular Running

- Top drive Casing Systems CRTi (Internal Grip CRT) and TESCO CDS
- Mechanical and Hydraulic Systems Top Drive
- Hoisting rating of up to 500Tons
- Up to 50,000 ft-lbs Torque Rating
- 7 to 20" OD Casings and 5k psi press
- Wireless real-time Torque Monitoring

Drilling Tools, Tubular and Jar Rentals

- Borehole enlargement
- Drilling Jars
- Rental Tools

Wellbore Clean-up

- Scrappers
- Magnets
- Brushes
- Size range from 7' up to 13-3/8'

Whipstock-Casing Exit Systems

- One-trip Whipstock Systems
- Mechanics and/or Hydraulic Anchors
- Range of Mills and Tri-mills for various Exiting Applications

Casing Accessories

- Float Equipment
- Cement Wiper Plugs
- Centrizers/Spirolizers
- Reamers shoes
- Bridge Plugs
- Cement Retainers
- Packers
- Liner Hangers

Fishing & Remedial

- External and Internal Cutting and Recovery
- Plug and Abandon Services
- Largest Inventory of Mills in West Africa
- Thru' tubing Applications
- Overshots, Grapples and Spears
- Wash Pipes, Shoes, Ditch & Fishing Magnets & Jars
- Hydrostatic Bailers, Junk Baskets, Magnets

Machine Shop & Fabrication

Machine Shop Services

- API 5CT Products and Services
- API 7-1 Products and Services
- Cross overs & Pup joints
- Coupling, Threading and Bucking Services
- of up to 14"
- Drilling and Completion Accessories
- Flange Manufacturing & Refurbishment
- OCTG

Fabrication Services

- Welding and Fabrication Services
- Skid Fabrication
- Repair works, Conductor casings & Welding Conductor Pipes
- Welding Well Heads and Conductors
- Housing & Repair Works
- Riser inspection & refurbishment
- Laying of inserts and Kutrites

Wireline & Slickline Capabilities

Cased-Hole Wireline

- Formation Evaluation
- Cement/Casing/Tubing Evaluation
- Production Logging
- Mechanical Pipe Cutting
- Gamma Ray Logging/Correlation/Pip Tags
- Memory Logging
- Saturation Logging

TCP - Services

- Gun Loading/RA Sub rentals

Perforation & Explosive Service

- Perforation & Tubing Punch
- Free-Point Indicators & string shots
- Chemical/jet cutters/Severing tools/ Split shots
- Zone isolation/Water shut offs/ P&A
- Plug/Packers/Cement Retainers for tubing & casing

Slickline Services

- SL Mechanical Services/BHP Surveys
- SL DH Valves/SSD Installation/Manipulation

Certifications

- IWCF Level 4 Certified Personnel
- OEM Certified Engineers

Casing & Tubular Running Services

Hammer Services

Piling of Conductor pipes as the foundation casing prior to drilling operation on both Land, Swamp and Offshore.

Tubular Running

Top Drive Systems | Power Tong | Torque Turn systems (Wincatt) | Stabbing | Handling Tools

Top Drive Casing Systems

- Hydraulic System – Tesco CDS (Casing Drive System)
- Mechanized Systems – Volant CRTI (Casing Running Tool Internal).
- Connect to the rig top drive. Used in conjunction with the Torque Sub (*Wirelessly transmit make up parameters to the Wincatt system to ensure make up integrity*).

Handling Tools

Several handling tools are available depending on the operations and size of pipe to be run with unique functions

- Elevators – , YC, YT, HYC/T used to Tubing
- 350/500 ton equipment – for Casing
- Single joint pick up elevators
- Side Doors / Center latch
- Back up tongs
- Fill and circulating tool
- Flush Mounted Spiders
- Hand slips
- Dual Slips / Elevators / Bails

AutoCLAMPTM System

- Eliminates Manual Handling, Improves Run Rates, Saves 8 Hours on Offshore Well
- Minimize manual handling when running multiple control lines during a completion operation on an offshore development well.
- Eliminate safety issues and reduce damage to control lines

6.1.8.9 Sliding Spider

The AOS developed Sliding Spider is designed for running Smart completions, Completions with multiple control lines or umbilical with large cable clamps.

Cold Cutting Services

Cold cutting is the use of cold work to replace hot work activities in hazardous locations. We have the capacity to cut sizes for 9 5/8" casing, 13 3/8", 20" , 24" 30" and 36" conductors. Personnel are OEM trained and currently undergoing practical sessions to master the tools

Cold Cutting and Beveling | Split Frame | Tool bits feed automatically | Minimal Axial and Radial Clearance | Lightweight and compact design | Easy Set-up | Pneumatic, Electrical or Hydraulic driven

Process Management Division

We provide instrumentation and process automation services, using cutting edges technologies through our Process Automation; AOS Orwell has the capacity to provide Valve Repair and assembling, cabinet manufacturing and fabrication, network design and system to allow remote site control, metering and flow measurement systems.

Wide range of products, solutions and turnkey services for Electrical and Instrumentation and Automation & Control

In-country Engineering Capabilities For Specialized Systems:

- Integrated Control and Safety Systems
- Substations & Field Auxiliary Control Room
- Switchgear, Motors, LV Panels PCS, DCS, PLC,
- PACs, RTU and HMI systems
- Modular Substations and Blast-proof E-houses.
- Security Systems (Access Control, CCTV, Intercom, PA) installation
- Safety Systems installation & commissioning services
- SCADA systems installation & commissioning services
- Field Instrumentation Systems and Testing (Bench Testing, Calibration. Loop Checking)

Mechanical, Electrical & Instrumentation (M, E&I) Services

AOS Orwell Electrical & Instrumentation (E&I) offers a wide range of products, solutions and turnkey services for electricity distribution and control, across various sectors: Industries, Utilities, Buildings, Residences. We are a leading distributor of high-quality electrical equipment

Our commitment to quality and customer satisfaction is reflected in the exceptional products we offer and the exceptional service we provide. Our business offerings improve the reliability and efficiency of our customers' activities across all major industries including the residential sector.

Our single-point solutions philosophy delivers value, spanning system design, application engineering, application software, product selection, control & monitoring systems, commissioning and lifecycle management

Electrical Switchgears

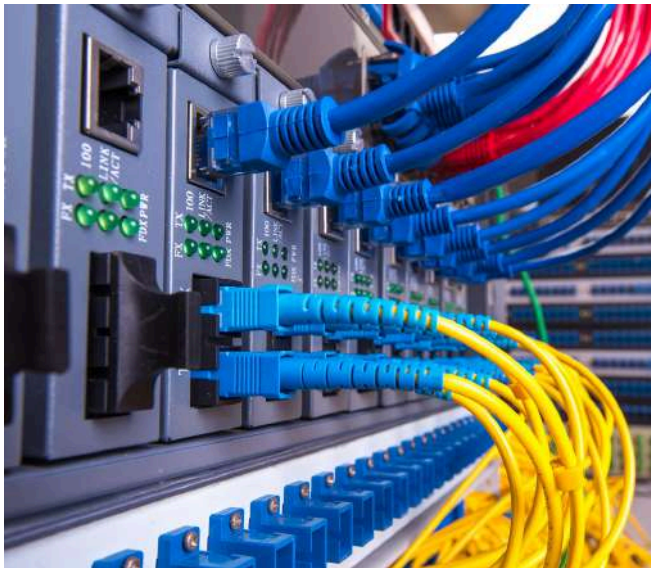

Our low voltage and medium voltage switchgears are designed for use in a wide range of applications, including residential, commercial, and industrial settings. It includes panel boards, distribution boards, MCCBs, and more.

Our low voltage and medium voltage switchgears are built to withstand the toughest conditions and provide reliable performance. From circuit breakers and buses to enclosures, panel boards and switchboards, we offer a full range of safe, reliable solutions for low-voltage electrical distribution applications.

Busbar Trunking & Cable Management

Busbar Trunking System is the is a system of distributing electric power using copper or aluminium busbar with suitable enclosures and good amount of protection to prevent the cables from getting damaged due to foreign bodies. The compact size and flexible design requires limited space and results in the availability of more usable floor area on every floor, adds a touch of elegance to the ambiance, and reduces on-site installation time.

Control Panels

Our control panels are designed for use in a wide range of applications, including motor control, lighting control, and HVAC control. We can customize our control panels to meet your specific requirements, ensuring that you get exactly what you need to meet your electrical needs.

Transformers

We offer a wide range of transformers, including distribution transformers, power transformers, dry-type transformers, oil-immersed transformers and special transformers. Our transformers are designed to provide reliable performance and are built to the highest standards.

Our transformers are designed to provide reliable and safe operation in various applications, including residential, commercial and industrial settings. We also offer customized transformers to meet specific requirements.

Lighting & Controls

We deliver a range of innovative and reliable indoor and outdoor lighting and controls solutions, specifically designed to maximize performance, energy efficiency and safety. LED solutions from our OEMs are built to withstand the toughest conditions, deliver maximum lighting performance and safety, and reduce expensive maintenance costs.

Our SMEs work with your team to consider about the key factors when selecting LED luminaires for your industrial lighting application.

Industrial UPS Systems

We offer a variety of industrial UPS systems, including single-phase and three-phase UPS systems, modular UPS systems, and more. Our UPS systems are designed to provide reliable and uninterrupted power supply in various applications, including industrial machinery, data centers, and critical facilities.

Our single-phase and three-phase UPS systems are designed to provide reliable and uninterrupted power supply in various applications.

Drives & Motors

We offer a variety of drives and motors, including AC drives, DC drives, servo drives, stepper motors, and more. Our drives and motors are designed to provide reliable and efficient operation in various applications, including industry, machinery, robotics and automation systems. We also offer customized drives and motors to meet specific requirements.

Our AC drives are designed for use with AC motors and provide precise control over motor speed and torque. Our drives are manufactured using high-quality materials and are designed to be energy-efficient and reliable.

E-House Integrated Solutions

Field Auxillary Room (FAR) Relocatable Pre Fabricated Containerized Buildings for housing of equipment: ICSS (Integrated Control Safety System) , Power Distribution & Management System, UPS, Switchgear, FGS, Telecommunication. Bundled offerings including design & engineering and construction; incorporates auxillary equipment.

24/7 Resident / After Sales Support

AOS ORWELL provides post-installation and commissioning activities, with 24x7 resident support and OEMs packaged solutions.

Design, Engineering, Assembly, FAT Installation & Commissioning Support Site Preparation E&I works Annual Maintenance Contracts Training.

Valve Solutions

AOS Orwell delivers comprehensive valve solutions tailored to the demanding needs of the oil, gas, and industrial sectors. Our expertise spans the supply, installation, automation, and maintenance of a wide range of valves, including flow control, actuation technologies and isolation valves.

As a trusted partner of leading OEMs, we provide high-quality, internationally certified valve products designed for reliability and performance in harsh operating environments.

Our team of specialists ensures seamless integration of valve solutions into existing systems, optimizing operational efficiency and safety for our clients.

Instrumentation & Analytical

AOS Orwell provides cutting-edge Instrumentation and Analytical solutions designed to enhance process efficiency, accuracy, and safety across the oil, gas, and industrial sectors. We offer a comprehensive range of instrumentation products and services, including pressure, temperature, level, and flow measurement systems, as well as process control and automation solutions.

In addition to instrumentation, our analytical solutions support real-time monitoring and optimization of industrial processes. We provide gas and liquid analyzers, emission monitoring systems, and process analyzers that help clients maintain product quality, environmental compliance, and operational safety.

Service Operations & Maintenance

At AOS Orwell, we are big on Service Operations and Maintenance. Part of our Service Business unit offer Operations & Maintenance Services to various customers. Our Service Business and Operations & Maintenance (O&M) functions include duties and labour associated with the daily operations and normal repairs, replacement of parts and structural components, and other activities needed to preserve an asset so that it continues to provide acceptable service levels and achieves its expected life cycle. Operations & Maintenance (O&M) include routine upkeep as well as corrective repair work.

Valve & Rotatory Equipment Asset Management

Reduce total lifecycle costs by extending equipment life. We offer full service repair and reliability programs for pumps and related rotating equipment, valves and instrumentation.

Our certified and highly experienced engineers offer customizable and comprehensible programs and updated software to monitor and support your rotating equipment and other assets, ensure 100% uptime, zero percentage downtime as well as eliminate recurrent lost time.

Maintenance Support

Our certified and highly experienced engineers & technicians offer customizable and comprehensible programs to monitor and support rotating equipment and other plant assets, ensuring minimum downtime as well as elimination of recurrent lost time.

We are currently servicing LNG assets in Nigeria, rendering General, Routine & Turnaround Operations & Maintenance Services while managing & operating all workshops with a fleet of over 400+ technicians and management team deployed at the facility.

We also:

- Ensure good functionality, reliability and availability of Distributed Control Systems (DCS).
- Have priority on-site assistance within the quickest possible and agreed time frame.
- Check the health of the system for optimization
- Maintain records

Metering Skid Solutions

We offer specialized Engineering Design, Construction and Commissioning of field-proven, innovative solutions for custody transfer flow management within the oil and gas industry.

We are able to offer optimized and fit-for-purpose technologies to suit your metering needs.

We have an integrated facility for fabrication, assembly and testing of metering skids. All our activities are done in-country, making it easier for our customers to be part of every single stage of the project from reviews to FAT.

We also offer certified after-sales services along with OEM training.

Fire & Gas Solutions

AOS Orwell partners with Detronics (Detector Electronics Corporation) to bring you fire and gas safety services such as;

Fire Detection:

- Flame detectors
- Smoke detectors for classified areas
- High Sensitivity Smoke detection VESDA

Gas Detection:

- Combustible
- Toxic
- Oxygen

System Solutions:

- Fire and gas detection systems
- Suppression systems

Service Portfolio

- Fire and Gas Mapping services Site assessment, Survey for detector selection and placement
- Design of detection, protection and suppression systems
- Site installation services, Start-up & Commissioning Support
- Alignment, calibration and testing services
- Xtralis VESDA and HSSD systems
- FM200/Clean Agent suppression systems
- Fusible Loops with charge panels
- FGS Mimic Panels and Annunciators
- Deluge valves and pumps, Surveillance cameras/CCTV
- Refurbishment and upgrade of legacy systems
- Turnkey FGS systems installation and testing for process areas and buildings

E & I Services: Turnkey Construction Services

AOS Orwell provides turnkey instrumentation and electrical construction services to EPC companies and to end users. The scope involves design, selection, procurement, supply, installation, calibration and commissioning of various field instruments, control systems, Valves, metering skids, LV/MV switchgear and substations together with equipment, tools and test equipment to safely assemble, install and test the following electrical and instrumentation systems and components

The scope of our work in managing the installation, startup and commissioning services includes:

- Design/Constructability Reviews
- Pre-planning & Execution Planning
- Construction Management & Supervision
- Field Engineering & Co-ordination
- Installation, Testing & Commissioning
- Client Instruction & Handover
- M, E&I Personnel Outsourcing

ICSS: Lifecycle Services

We offer an integrated array of lifecycle services across all of the process systems and solutions platforms.

Our comprehensive system lifecycle maintenance services by certified engineers involve;

- Maximum system reliability delivered by certified experts to perform maintenance tasks using established and proven system maintenance and diagnostic routines
- Service level agreements including call offs & resident engineer site support services
- Plant Package PLC System Installation, Commissioning & Start-up services
- Development of remediation plans to improve cyber security protection
- Education & Training Services

FEED (Front End Engineering Design)

- Detailed design and Engineering
- Assembly & Testing/Staging in local facilities

Asset Integrity Management

Our unrivalled asset experience allows us to offer a robust and fully assured suite of maintenance services. Our maintenance experts work hand-in-hand with operations to ensure assets continue to operate effectively with no unexpected failures or downtime. We run a Global Maintenance Center (GMC) – Managing maintenance operations across multiple client locations.

Asset Integrity Management: FPSO Integrity Strategy & Planning

When it comes to FPSO tanks integrity and FPSO hotwork repair, we bring in our OEM partners' proven methods to extend the life of your assets safely.

O & M Capabilities

As O&M services specialists with many years of hands on experience, we are able to develop innovative solutions, tailored to meet both short and long-term business needs of our customers. We have built our experience in some of the most competitive environments around the energy industry. Cost is always a key focus but we balance this with the added value, assurance and safety performance that underpins our reputation.

Our in-house expertise, capabilities and skills enhance the structural integrity of industrial assets, helping to maximise operational time and lifespan of structures and facilities. We have the capacity to deal with projects of all sizes, from one-off capital projects to complex infrastructure programmes and rolling fabric maintenance contracts.

With a unique scale and experience, we have established teams providing:

- Operational & maintenance solutions
- Automation, Metering and Electrical & Instrumentation
- Rotating Equipment
- Fabric Maintenance
- Inspection services Vibration, dynamics, and noise capability
